Abstract:

Website Creation Transfer Paper By Using Microsoft FrontPage 2003 is a World Wide Web application that contains information about how to create an image on a T-shirt with Transfer Paper, which is packaged into an attractive and interactive form created using Microsoft FrontPage 2003. It is expected that these applications can help users of this web page to find additional information about how to use Transfer Paper.

Using Microsoft FrontPage 2003, this application is the combination of elements of web pages are pictures, and hyperlink text, which are summarized into a single application into a form that is expected to easily be used by anyone and is made as attractive as possible while using this application. By simply clicking on one of the options from the menu the user will immediately get the information quickly.
